FULL-STACK WEB DEVELOPER

Experienced in building real-world systems including inventory and CMS platforms with authentication, role-based access, and REST APIs. Focused on performance, clean architecture, and deployable applications.

SKILLS

Frontend: React, Next.js, TypeScript, TailwindCSS

Backend: Node.js, PHP, CodeIgniter

Database: MySQL, PostgreSQL, Prisma

Tools: Git, Docker, Vercel, Supabase

PROJECTS

Inventory Management System (Next.JS + TypeScript)

April 2026 - PRESENT

- Built a real-time inventory system for e-commerce live selling, preventing overselling during concurrent updates using optimistic concurrency control.
- Designed full-stack architecture with Prisma ORM, PostgreSQL transactions, and shared Zod validation for type-safe API communication.
- Implemented offline-first PWA support and automated Excel reporting for sales tracking and reconciliation.

Portfolio CMS (React + Supabase)

April 2026

- Developed a dual-interface portfolio system with public site and admin dashboard for content management.
- Integrated Supabase (Auth, Database, Storage) for real-time updates and authentication.
- Designed responsive UI using CSS modules and reusable components.

Student Management System (React + CodeIgniter)

November 2025

- Built a full-stack system with React frontend and CodeIgniter REST API backend.
- Implemented 8 CRUD modules including students, grades, attendance, and payments with GPA auto-calculation.
- Developed role-based dashboards with protected routes and authentication handling.

EDUCATION

3rd Year Bachelor of Science in Information Technology

Systems Plus Computer College Caloocan

Expected Graduation: June 2027
